ABOUT

Family Business Central

Family Business Central is the leading consultancy, **advising family businesses** throughout Australia and New Zealand.

We are focused on helping family businesses thrive and grow for generations to come - building a true legacy.

We act as trusted advisers, guiding families through difficult transitions using a proven process that delivers improved relationships, a clear path forward and aligns the family with the business.

“Love and money are a potent brew and need to be carefully managed.”

Through many years of experience working with family businesses, we have developed a reputation for being able to resolve challenging issues between family and business. We work closely with the family to strengthen the bonds that hold it together to build an amazing future.

This enables the business and individuals to realise their full potential while maintaining strong, healthy relationships.

OUR SERVICE

We develop key family governance documents such as a **Family Charter** and **Succession Plans**. Plus, we provide guidance and processes to set up a **Family Council** and **Family Forums** to help align the family with the business and set well-defined goals for the future.

We are the experts in designing and implementing family and business governance structures that enable family members to align with the business, as well as managing the complexity of running a family and a business.

We also offer individual and group mediation sessions. These are extremely helpful in resolving disputes between family members, shareholders, board members and employees. We enable and facilitate the crucial conversations to take place within the family resolving relationship issues that could otherwise damage family relationships and severely impact the performance of the business.

“Take control of succession and building your Legacy rather than being controlled by it.”
